

# TRENDTRACKER™

Condition Monitoring and Data Management

*The ideal device for trendlining and recording the performance of your compressor's air-end over time.*

## **Key Benefits:**

- Helps Reduce Unplanned Shutdowns
- Maximizes the Life of Your Air Compressor
- Minimizes Downtime

# TRENDTRACKER™... Higher Uptime and Efficiency Through Condition Monitoring and Planned Maintenance

More and more companies are realizing the benefits of preventative and predictive maintenance practices. Trendlining the performance of key components over time can provide advanced indication of imminent equipment failure.

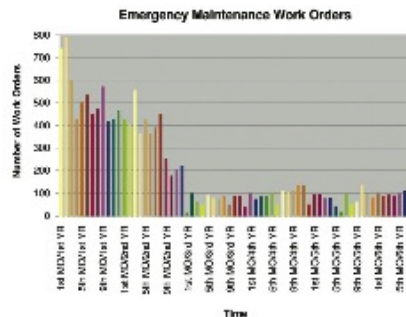

The Sullair TRENDTRACKER™ is a condition monitoring instrument and data collector in a single, lightweight handheld package. It is the ideal device for trendlining and recording the performance of your compressor's air end over time.

The data processed by the TRENDTRACKER™ serves as your first indication that the air compressor in question needs further examination. (e.g. out of alignment, coupling issues, etc.) Routine use of Sullair's TRENDTRACKER™ by a factory trained representative, as an integral part of your maintenance agreement, helps you plan for repairs and prevent unforeseen shutdowns that would otherwise lead to loss of production and higher service costs.

**Improve your uptime and reliability. Only your Sullair Distributor can put the TRENDTRACKER™ to work for you!**

With a monthly increase in planned maintenance, emergency work orders dropped dramatically.

With planned maintenance, the number of emergency labor hours dropped significantly during the same period, reducing labor expenses and adding predictability to the availability of the compressed air system and the processes it supports.

The TRENDTRACKER™ condition monitoring tool is part of a series of value added services from CUSTOMER CARE BY SULLAIR™.

CUSTOMER CARE BY SULLAIR™ is a component of Sullair AirMetrix™—solutions to help compressed air users reduce their energy costs and improve their productivity by analyzing, managing and controlling total compressed air systems.

Sullair offers AirMetrix™ solutions that can help reduce energy costs and improve productivity by analyzing, managing, and controlling the total compressed air system.
